Ergonomics

A long-lasting work in an inconvenient position may lead to occupational diseases (muscle and joint disorders). This is why desks in ALFA system have the possibility of height adjustment, which gives a chance to adjust the workplace to the worker's height and minimize the risk of spinal disorders.

partitions

screens

An economical way of dividing workspace

Organizing some space both over and under the table has a lot of advantages. Work becomes more pleasant and more effective. Due to the implementation of proper accessories it is very easy to keep order. Simple and stable holder adjusted to bigger computer set up vertically, directly under the desk top provides easy access to the unit and greater freedom of movements.

Aluminium mediabox provides access to the network vault and power supply. It can be used in desk tops and conference tables.

The desktops boards display a special office surface quality which diffuses light and is smooth enough to facilitate writing. 28 mm thick desktop is rigid enough to be used with four independent legs.

Safe construction

Our designers pay special attention to furniture's construction stability and care for its conformity with safety norms of the European Union countries. All materials used for production have the hygienic certificates confirming their nontoxicity.

Implemented height regulation gives a possibility to adjust the desk to the height of the user providing maximum comfort at work and proper bodily posture. Working for a long time at the desk can cause various diseases of the spinal column. Due to proper setting of the height of the desk work becomes more comfortable, healthy and safe. Continuous height adjustability within 68-78 cm (screwable foot)

divide

your
office

Simple, lightweight and modern construction designed according to the world's current trends of industrial design.
28 mm thick desktops available in various shapes.
Desks, extensions, conference tables available in a wide range of colours.
The desktop's geometry allows to place the screen in a safe distance from the eyes (70-80 cm).

120° workstation

ALFA 120° workstation is ideal solution where communication is required.

organized

office
space

A collection of cabinets and bookcases is available in various heights and widths with shutter fronts, gull-wing door, sliding door, glass door and open shelves. They make work easier and help to organize space in the office.

reliability

prestige

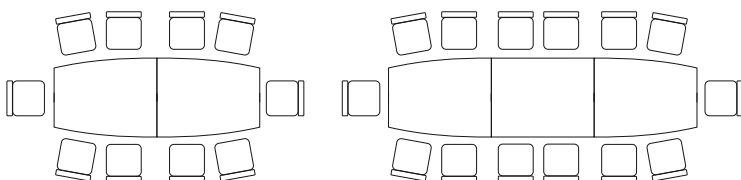

Endurance and durability

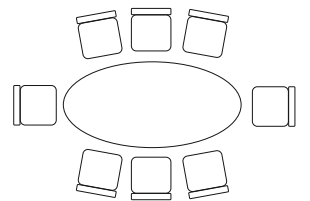

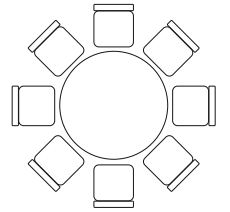

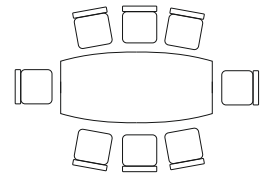

MDD's furniture is produced from materials of proved quality and elements delivered by renowned suppliers from all over the world.

curious meeting space

ALFA possesses all elements which are essential in creating an inspiring and functional surrounding in the office and proper atmosphere. Conference tables shall constitute a supplement of the ALFA line. They were designed to held conferences in small and big rooms.

Partitions cloth panels hanging frames

Partitions and screens divide the space optically and reduce noise. Coated with cloth, partitions (40 mm thick) are connected at the right angle. You can place on them shutter cabinets, shelves, as well as hanging frames. Cable channels have been designed in the base.

division of labor

Tidiness and comfort

To set optimum work conditions arrange supplementary furniture, panels and partitions. Noise in workplace is both tiring and lowers effectiveness. This is why we recommend the use of partition walls, panels and cloth-covered screens that reduce the sound level by approximately 30%.
