**ALONE WITH YOUR PHONE CALL,
AWAY FROM THE BUSTLE.
TOTAL FOCUS, PRIVATE SPACE.**

Public but private

Where does one go in the middle of a busy public space to answer a phone call? Where does one go when looking for a place to enjoy a moment of silence, a place where one can make careful notes, important telephone calls, or simply reflect on and review one's thoughts?

The idea for the PhoneBox is the result of careful observations made in public spaces and an examination of the different ways that it can be used. 'Public & private' is the idea that the PhoneBox offers a quiet space to settle amidst the bustling situations of public space. It literally opens up a new space within an already existing one. The unique design of the compact enclosure creates a muffling effect from the outside noise allowing the user to not be disturbed — an oasis of peace and quiet, a place where the comfort and beauty of design can adapt appropriately to all different public space.

Dimensions

Configurations

'Public & private' is the idea in which the PhoneBox offers a quiet space to settle in the public area. It literally opens up a new space within an already existing one. The PhoneBox comes with or without writing tablet . Mounted individually or next to one another on the walls. Very easy assembly with brackets.

“No more fumbling with coffee cups and pen and paper. Privacy, focus and I have my hands free. In addition, no one is disturbed by my phone calls.”

“A welcoming spot that let's me take and make calls undisturbed and focused*. It feels secluded and there's no more need to whisper.”

*The PhoneBox reduces noise levels by 5dB, resulting in less distraction from background noise.
